

## Computational Scientist Summer Intern Position

**Stone Ridge Technology** has a summer intern opportunity for a qualified student in Computer Science, Electrical Engineering or Physics. Qualified candidates will have experience with C/C++ and UNIX and the ability to rapidly assimilate and contribute to a large and complex scientific or engineering application. Students within one year of completion of the MS or BS degree with the following skills are desired:

**Skills:** C/C++, UNIX, Fortran, Scientific Programming, Parallel Programming, Numerical Methods, Algorithm Development

**Stone Ridge Technology** works in the High Performance Computing Industry. It is developing proprietary hardware and software that enable the use of multi-core CPUs, GPUs and FPGAs for accelerated computing. The company has clients in both government and industry. Candidates should be comfortable with an aggressive, high-energy startup environment. Interested candidates should email resumes to Dr. Vincent Natoli [vnatoli@stoneridgetechnology.com](mailto:vnatoli@stoneridgetechnology.com). This position is in Bel Air, MD.
